Q2.I would ask , can I get a proper documentation of every table separately with right description of each column.

The additional data I would ask for the 'Progress of candidate' table:

- 1.The data in the table are not valuable for analysing the the progress accurately.
- 2.Based on the data that is provided it is hard to draw any numeric value of week 2 which does not help at all.
- 3.It is good for both of our interest if I can get any real data of inspection of their progress.
