Q2 Power BI Desktop .I would ask , can I get a proper documentation of every

table separately with right description of each column.

The additional data I would ask for the 'Progress of candidate' table:

1.The data in the table are not valuable for analysing the the progress accurately.

2.Based on the data that is provided it is hard to draw any numeric value of week 2 which does not help at all.

3.It is good for both of our interest if I can get any real data of inspection of their progress.
